

Acuvim-L

Multifunction Power & Energy
Meter Datasheet

ACCUENERGY

DESCRIPTION

Designed for a wide range of standard metering projects, the Acuvim L is a cost-effective, multifunction power meter that combines value and high-performance with easy integration into panel or device monitoring applications. With multiple communication options including Modbus-RTU, PROFIBUS, Modbus-TCP/IP, and BACnet-IP through optional expansion modules and revenue grade accuracy, the Acuvim L can be configured as either a panel-mount device, as a DIN rail mount transducer, or installed in a pre-configured, pre-wired AcuPanel for extreme protection in even the toughest application environments.

FEATURES

- + True RMS, revenue grade measurements: ANSI C12.20 class 0.5 & IEC 62053-22 class 0.5s
- + Multiple communication options including Modbus-TCP/IP, BACnet-IP, PROFIBUS, Modbus-RTU, I/O communications, and more
- + NEMA 3 front panel protection for installation in harsh environments
- + Available compatibility with multiple CT output options including 5A, 1A, 333mV, and Rogowski coils
- + Perform power quality analysis, measure individual harmonics up to the 63rd order, and monitor THD
- + Three form factors: Panel mount meter with digital display, DIN rail mount transducer, or in a pre-wired, pre-configured panel

KEY FEATURES

Revenue Grade Accuracy

- + The Acuvim L meets stringent ANSI C12.20 Class 0.5 and IEC 62053 Class 0.5s revenue grade accuracy requirements to support applications that require high-precision measurements. Monitor power and energy parameters across four quadrants and take real-time, true RMS measurements.

Alarm Output

- + Two parameters may be set within a specified time interval. When the indicated parameter is over or under its setting limit and persists over the specified time interval, the event will be recorded with a time stamp and trigger the alarm output. Choose from any of the 51 available parameters.

Flexible Current Input

- + The Acuvim L is directly compatible with a variety of current transformer outputs including 5A, 1A, 333mV, and Rogowski coils. Choose from multiple form factors including split-core, solid-core, or flexible rope CTs to accommodate a range of project requirements.

Wiring Check

- + The Acuvim L can automatically check the integrity of the meter installation by verifying the wiring mode, load features, and power factor values to ensure proper installation before leaving the job site.

Power Quality Monitoring

- + Using harmonic analysis, the Acuvim L can detect energy deviations that are critical to diagnosing power quality issues before they cause system inefficiency. Monitor individual harmonics in voltage and current and quickly view real-time power quality information, like harmonic content and unbalance factor, on the meter's display. In addition, record up to 16 power quality events with a timestamp and triggering condition information for later analysis.

Communications Modules

- + RS485
 - Modbus-RTU
 - Second RS485 port (option for Acuvim-CL, Acuvim-EL)
- + PROFIBUS
 - PROFIBUS-DP/V0 Protocol
- + L-WEB Module
 - Modbus-TCP/IP
 - BACnet-IP
 - HTTP/HTTPS Post
 - FTP Post
 - NTP
 - DNP 3.0 over IP V2
 - SNMP V3
 - HTTPS webserver
 - SMTP
- + I/O Module Options
 - Digital Input
 - Pulse Output
 - Pulse Counter
 - Relay Output

APPLICATIONS

- + Power distribution automation
- + Medium and low voltage systems
- + Industrial automation
- + Energy management systems
- + Power quality analysis
- + Electric switch gear and control panels
- + Building automation
- + Marine applications

ACCESSORIES

DIN Rail Adapter

The AXM-DIN Rail Adapter is the easy way to mount the Acuvim L Series multifunction power meter on either horizontal or vertical DIN rail. The adapter quickly secures to the meter and is compatible with all I/O module options.

Protective Display Cover

The Protective Display Cover is designed for Acuvim L Series power meters and other 96mm by 96mm display panel meters. Crucial in harsh environments, it increases the IP environmental rating of a meter's display to IP66 or NEMA 4X.

USB RS485 Converter

This professional-grade, plug-and-play USB to Serial RS485 Converter is compliant with both USB 1.1 and 2.0 standards and is designed to provide a convenient, reliable USB connection to Acuvim L meters and other serial devices. It requires no external power supply and provides both surge and static electricity protection.
