

VerifEye™ Series 2000

Three Phase Meters

Sub-Metering Solutions for Accurate Measurement & Verification

DEFINITION

The Leviton VerifEye™ Series 2000 line of revenue-grade meters meets all measurement and verification-based opportunities – including load management and LEED rating achievement. Designed to provide a simple and effective process for accurately capturing measurements of power consumption, Series 2000 meters are easy to specify and install for new construction and retrofits.

- 3-Phase, 4-Wire applications, 120/208V or 277/480V
- kWh and demand (optional)
- Large LCD display
- Isolated pulse output channel
- 100A-1200A Services

Leviton meters utilize highly accurate current transformers for revenue-grade performance certified to ANSI standards. Competing products use current sensors that do not provide the same level of performance. Leviton offers Current Transformers (CTs) in solid and split core styles to accommodate all phases of installation and construction.

Solid core CTs are ideal for new construction, when power is not live and wires can easily be threaded through the core. Split core CTs can be installed at any time without having to disconnect wire terminations, making them the optimal choice for retrofitting an existing structure. Split core CTs close securely for fast, precise installation with no need for time-consuming tie wraps and no worries about improper seating or core half separation. Both solid and split core CTs offer high quality, long term accuracy and reliability.

Every Series 2000 meter has an installer-friendly feedback feature. The red reverse phase indicator acts as an installation diagnostics tool and illuminates if a meter is improperly installed. After installation, the green duty cycle light shows that the meter is collecting electrical consumption data at the appropriate rate. All 100 and 200 Amp solid core CTs have color-coded labels to easily identify and correctly land the wires at the meter.

THREE ELEMENT SERIES 2000 HOOKUP DIAGRAM

Leviton recommends solid core transformers (CTs) for revenue-grade accuracy. Our 100A and 200A color coded CTs assist with correct installation by indicating phase monitored. Split core CTs are also available upon request for applications where power cannot be interrupted during installation. Our 100-1, 200 Amp Split Core CTs offer +/-1.0% accuracy.
